MIRRORS

MIRROR FEATURES

Discover our collection of mirrors encompassing a wealth of design features to brighten up your bathroom.

Light Temperature Changing Technology

This lets you create the perfect bathroom environment by enabling you to adjust the warmth of your mirror illumination to suit both the task in hand and time of day. Kick-start your day with bright, invigorating daylight. Then choose a natural light to apply make-up and a warm light for sleepy late evening tasks.

Light temperature ranges from 2700K (Warm White) to 6000K (Daylight White). You can also adjust the intensity of the light to be as bright or as dim as you wish.

Steam Free

Many of our mirrors feature a heated demister pad to keep your mirror steam-free. You'll really appreciate never having to wipe it down again!

The heated demister pad heats the mirror to a few degrees above room temperature within 2-3 minutes, preventing the mirror from misting in even the steamiest of bathrooms.

Infrared Switch

Easy to use, an infrared switch allows you to control the mirror with just the wave of your hand, without touching it.

Important: When mounting mirrors with infrared switches, the sensor must be at least 150mm from an adjacent wall or obstruction to ensure the switch can function properly.

See individual details on each mirror for applicable features.

Touch Sensor

Control your lighting with just the touch of a button. Our easy to use touch sensor mirrors allow you to effortlessly switch between lighting modes to create your perfect ambience.

Bathroom Safety

Tavistock mirrors have been tested for compliance with electrical equipment safety regulations. Our illuminated mirrors are IP44 rated and suitable for use within the bathroom.
